Twilight

The World's First and Only Indoor/Outdoor See-Thru Fireplace

Entertain inside or out while enjoying the Twilight from either angle. This see-thru direct vent acts both as a fireplace and window, allowing a spectacular fireplace view in your living room and patio simultaneously. The outside face acts as a vent, so there's no outside cap to interfere with your view or complicate your installation. The Twilight is also weather-proofed to withstand the elements.

- Two-sided view offers a spectacular site - inside and out
- No venting required offers installation versatility and a clean outside appearance
- 37,800 BTU Input/Hr. provides generous flames and heat output
- High thermal efficiency keeps you warm and cozy
- Sealed combustion chamber works in a negative pressure situation with no cold drafts
- Completely weather proof to protect the outside portion from the elements
- Safety tested
- Optional remote control
